

RZR P90X REVOLVER CLUTCH COVER INSTRUCTIONS

Thank you for purchasing your P90X Revolver clutch cover from AA! The cover is made to fit on the P90X clutch found on 2020-2021 Pro XP and 2021 RZR Turbo & Turbo S. This cover is designed to strengthen the clutch with its more rigid design and tower lock system. The tower lock system is designed to prevent clutch tower flex, providing a more rigid clutch design. The Revolver clutch cover is also designed to move more air through your clutch cover with the larger fins on the plate. See below for steps on easy installation.

- Remove the clutch cover duct and clutch cover from the vehicle
- Locate the 6 bolts holding the factory spring cover in place and remove them carefully as you have some spring tension under the cover
- Install the AA Revolver clutch cover in place of the factory cover with stock bolts
- There is no orientation needed (no X) on our cover
- Torque the factory bolts to 9-10ft-lbs
- Install your clutch cover and go ride!
