

## PRIMARY CLUTCH LIMITER RZR TURBO & RS1

Thank you for purchasing your primary clutch limiter from AA! This is designed to stop the clutch from over shifting which can cause belt slip and many other clutch/belt issues as well as center the spring for more consistent clutch performance. This will fit any RZR turbo (Not Pro XP) or RS1 clutch 2016-2020. Below are instructions on how to install your clutch limiter.

- First remove your outer clutch cover with the 8mm bolts
- Remove the 6 bolts (10mm) holding the spring cover and spring in place
- Remove the factory limiter washer, and REPLACE it with our AA white limiter
- Assemble the clutch and make sure the limiter and 6 bolt plate is orientated correctly as shown in the image below.
- Install the cover and all other parts like factory and go ride!
