

REVOLVER PRIMARY COVER FOR 2016-2020 RZR TURBO

Thank you for purchasing your 2016-2020 RZR Turbo Revolver clutch cover from AA! The cover is made to fit on the original clutch found on these year models, and will also fit our AA replacement primary clutch. The Revolver cover is designed to strengthen the clutch with its more rigid design and tower lock system. The tower lock system is designed to prevent clutch tower flex, providing a more rigid clutch design. The Revolver clutch cover is also designed to move more air through your clutch cover with the larger fins on the plate (Similar to our fan blade). Please note that the revolver cover cannot be used in conjunction with our fan blade for this clutch, it's either one or the other.

Parts included: Revolver cover

- Remove the clutch cover duct and clutch cover from the vehicle
- Locate the 6 bolts holding the factory spring cover in place and remove them carefully as you have some spring tension under the cover
- Install the AA Revolver clutch cover in place of the factory cover with stock bolts
- **** IMPORTANT**** Make sure your stainless sliders fit inside the revolver cover tower lock by pulling each one towards the outside of the clutch. If these are not seated and the cover holds the sliders outward, your clutch may stick at idle. See image below.
- There is no orientation needed (no X) on our cover
- Torque the factory bolts to 9-10ft-lbs
- Install your clutch cover and go ride!
